

Are you choosing the right barrier solution for your paper & board packaging?

Guide your production developments & investment decisions with clear, impartial and up-to-date insights into barrier solutions.

A clear and independent view to guide your barrier developments

CTP helps you identify and compare barrier solutions for paper and board packaging, with technical insights to support innovation and investment decisions.

Commercial barrier product database

Access an up-to-date database of 50+ commercial barrier products for paper and board packaging, covering grease, oxygen or water and water vapour barriers.

Technology and application insights

Understand key technical parameters: barrier performance, application, food-contact, converting and recyclability.

Emerging technology monitoring

Anticipate market trends with a structured review of emerging barrier technologies including TRL, benefits, limits and applications.

Two dedicated monitoring reviews

Choose your review: Water & Water Vapour or Grease & Oxygen barrier solutions. Annual July update with latest products, technologies and market trends.

Clear deliverables and expert support

Receive a concise technical report, a comparison table and one hour of expert assistance to help you identify the most relevant options for your applications.
