David Guérin (CTP)

11:25-11:50: Development of a new barrier packaging by printing technology.
Stefan Kirstetter (Malengé Packaging)
Laurent Lenglet (CTP)

11:50-12:15: Eucalyptus pulp fractionation: production of distinct fractions for separate valorization.
Heloisa Ramires (Suzano)
Saurabh Kumar (CTP)

12:15-13:30: Lunch break

AFTERNOON session: Charting a course for the future!

Objectives and Performance Contract & MALICS' Platform

Chairperson : Guy Eymin Petot Tourtollet / CTP

13:30-16:30

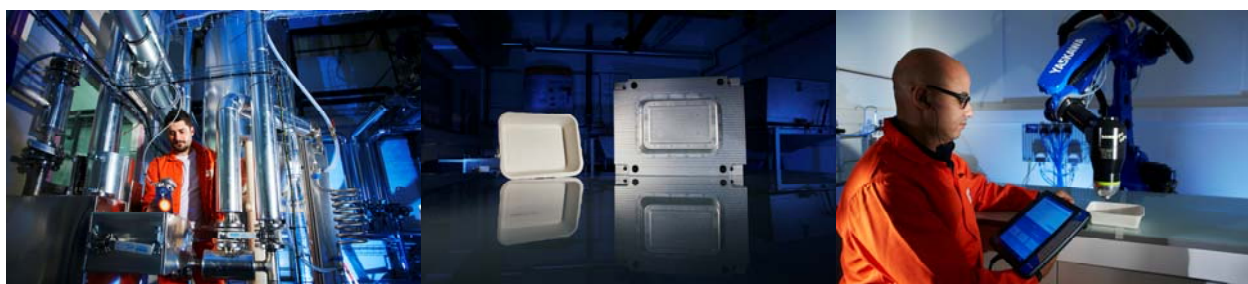

- Roadmaps at the CTP: an approach paving the way for the future.
- Illustration of the 2020-2023 COP: what projects will set out the industry's future?
- Malics platform, investments for the future.
- Virtual overview of few technologies.

Objectives

The CTP Webinar, taking place on **October 6th 2020**, is designed for industrial firms in the pulp, paper and board sectors, printers, converters and suppliers!

The concrete examples presented will reflect the creativity and inventiveness of the CTP, and its ability to bring scientific projects to industrial and economic fruition. The Innovation & Research Division will also set out the broad outlines of the CTP's future.

This edition will also be an opportunity to **present three years of investments in the Malics Platform** and its associated projects, which focus on developing innovative lignocellulosic packaging that is functional, resource-efficient and enhanced with new properties in line with consumers' expectations.

Organisation

Registration: webinar organised by the CTP.

Date: Tuesday, October 6th, 2020

Timing: 8:30 am to 4:30 pm (*local time*)

CTP's Contact: Gaëlle Parret
