Objectives

On **May, 22nd, 2019**, our event called “**What’s on CTP?**” will be dedicated to companies in the pulp, paper and cardboard industry as well as printers, companies in the paper processing industry and suppliers.

Through a number of practical examples, this will be the opportunity for you to find out about the creativity and the innovation of the CTP as well as its ability to turn scientific projects into industrial and economic reality. This second edition will be our chance to present our new equipments through the **MALICS Platform and its related projects**. They lead to the development of new lignocellulosic packaging materials, which is innovative and practical. It is also low-on-raw-material with increased properties to meet consumer expectations.

We warmly encourage you to join us. It would mean for you forging new business relationships, meeting our experts but also industrial partners to speed up your business.

Organisation

Registration: The **CTP Rendez-vous** is organised by the *Centre Technique du Papier*.
